

Alla's Bio:

My husband and I moved to St. Johns County from Palm Coast Flagler County with our three children in August 2013. We chose to relocate because we heard wonderful things about St. Johns County, particularly about the opportunities in the schools and community activities for the kids. I have been providing speech, language and swallowing therapy to children and adults since the year 2002. I am very happy to have the opportunity to provide therapy to preschool and school-aged kids in this wonderful county and get to know the kids in my community.
